

Amendments to the Specification

Please amend Paragraph [36] as follows:

In case the connection to the mobile phone 600 is not made within a certain period of time (for example, within 10 seconds), the data supplying server 300 can ask to connect and the data supplying server 300 can transfer the compression data and the phone number of the receiver to the data storing space 500 associated with the mobile phone 600 for storage. The compressed data, an audio guide message, and the phone number of the mobile phone 600 may be stored in the data storing space.
